

Making GARLOCK 7021 Compressed Asbestos Sheet Packing at the Garlock factory.

Just the Right Mixture

In the manufacture of Garlock 7021 High Pressure Sheet Packing, long fibre asbestos is mixed with rubber binder according to a Garlock formula and to exacting Garlock standards. The mix is fed into sheeters and is compressed under heat into this superior gasketing material.

Expert workmanship and quality control result in a compressed asbestos sheet of great strength and uniformity. For satisfactory service use Garlock 7021 on pipe lines and other equipment handling gasoline, oil, gas or steam at high temperatures and extreme pressures.
